(Posting Number CA-2026-01)

A summer student/internship position is currently available in our corporate office located in Calgary. As a geophysics summer student, you would support the Geophysics team with seismic interpretation, modeling, and data management tasks for assets in Colombia and Ecuador. This role provides hands-on experience with industry tools and real-world geophysical workflows. You will have an opportunity to gain oil and gas experience with mentorship and guidance from a team of professionals. The work term will be from May 4, 2026, to August 28, 2026.

Job Responsibilities:

- Assist with seismic interpretation for 2D and 3D datasets in Ecuador and Colombia.
- Perform horizon picking, QC, and interpretation updates.
- Support 2D seismic modeling and inversion QC.
- Contribute to technical assurance documentation and data organization.
- Collaborate within a multi-disciplinary technical team in the Calgary office.

Required Qualifications:

- Currently enrolled in or graduated from a Geophysics program.
- Familiarity with seismic interpretation principles.
- Self-starter with strong analytical and organizational skills.
- Experience with Petrel or SeisWare would be considered an asset.
- Exposure to inversion workflows and 2D modeling concepts would be considered an asset.
- Spanish language would be considered an asset but not required.
- Strong communication skills (written and verbal).
- Positive attitude and willingness to take initiative.
- Results oriented and motivated, with a desire to learn and develop skills.
- Ability to manage multiple priorities and projects.
